FOOD FRAUD (VACCP) TRAINING

VACCP (Vulnerability Assessment and Critical Control Point) outlines a method to protect food and beverage products from fraud and potential adulteration.

In a vulnerability assessment, a food business will look for vulnerabilities in its production processes and supply chain to work out the points at which food fraud can happen. This is useful because it makes it easier to complete a threat assessment and identify the specific kind of food fraud that can occur.

During this training we will assess ways of conducting a threat assessment.

THE COURSE WILL RUN OVER A PERIOD OF 1 DAY

WHO SHOULD ATTEND THIS COURSE:

- Food Safety Team Leader
- Risk team members / VACCP Team
- Food safety team members

MINIMUM ENTRY REQUIREMENTS:

- Fluency in English writing and reading skills

TUITION:

- Training material included (English)
- Certificate of attendance or competence (based on outcome of assessment) will be issued on successful completion of training

LEARNING OUTCOMES:

- This training will provide participants with the knowledge and process steps to enable them to effectively conduct a threat assessment for VACCP.
- Develop a control/mitigation plan
- Equip delegates to perform annual review.

COURSE CONTENT:

- What is Food Fraud?
- The Importance of Food Fraud Prevention
- Types of Food Fraud
- Understanding VACCP
- Food Fraud Mitigation Strategies
