MICROBIOLOGY METHOD VERIFICATION (SECONDARY VALIDATION) AND UNCERTAINTY OF MEASUREMENT (BASED ON TR28-03) PRACTICAL TRAINING

This tailored in-house course is designed to provide participants with a comprehensive understanding of method verification (secondary validation) and uncertainty of measurement in accordance with ISO/IEC 17025:2017 and additional accreditation requirements in a Microbiology testing laboratory.

Method verification, a critical process ensuring the appropriateness of analytical procedures for specific tests, will be explored in depth.

The course integrates theoretical knowledge with practical application by demonstrating the verification of methods currently employed within your laboratory. Practical sessions encompass key aspects such as theory application, sample spiking, quality control, statistical result evaluation, and the reporting of verification data, all aligned with SANAS TR28 requirements.

The goal is to empower participants with the knowledge and skills necessary for ensuring the quality, reliability, and consistency of analytical results in accordance with best practices and accreditation standards.

THE COURSE WILL RUN OVER A PERIOD OF 3 - 5 DAYS
(DEPENDENT ON METHODS CHOSEN FOR PRACTICAL DEMONSTRATION)

LEARNING OUTCOMES:

- Understand the underlying theoretical structure of method verification (secondary validation) and uncertainty of measurement.
- Practically perform method verification and determine the uncertainty of measurement in compliance with ISO/IEC 17025:2017 and SANAS TR28 accreditation requirements.

WHO SHOULD ATTEND THIS COURSE:

- Laboratory / Quality managers
- Analysts / technicians
- Technical signatories
- Anyone involved in method development in a microbiology laboratory

MINIMUM ENTRY REQUIREMENTS:

- Fluency in English writing and reading skills

TUITION:

- Training material included (English)
- Certificate of attendance or competence (based on outcome of assessment) will be issued on successful completion of training.

COURSE OVERVIEW:

DAY 1

- Theory:
 - Introduction to method validation and verification
 - Method verification documents

santie@michemdynamics.co.za | angeline@michemdynamics.co.za | 082 770 7127 or 078 335 0528

www.michemdynamics.co.za

- Verification parameter: Accuracy
- Verification parameter: Repeatability
- Verification parameter: Reproducibility
- Verification parameter: Linearity
- Verification parameter: Limit of Detection (LOD)
- Verification parameter: Selectivity / Sensitivity
- Verification parameter: Robustness
- Uncertainty of measurement

DAY 2

- Practical demonstration in the laboratory

DAY 3-5:

- Practical demonstration in the laboratory continues
- Statistical result evaluation
- Reporting of method verification and uncertainty of measurement data
