RISK MANAGEMENT ACCORDING TO ISO/IEC 17043:2023 TRAINING

The ISO/IEC 17043 Risk Management Training course provides participants with a comprehensive understanding of risk management principles tailored to the field of proficiency testing providers. ISO/IEC 17043 sets out the general requirements for the competence of providers of proficiency testing, and effective risk management is essential for meeting these standards. This course is designed to equip participants with the knowledge and skills needed to identify, assess, and manage risks in the context of proficiency testing.

By the end of this training, participants will be well-prepared to integrate robust risk management practices into their proficiency testing operations, ensuring compliance with ISO/IEC 17043 standards and the delivery of high-quality proficiency testing services.

THE COURSE WILL RUN OVER A PERIOD OF 1 DAY

WHO SHOULD ATTEND THIS COURSE:

- Technical / Quality / Scheme managers
- Nominative representatives

MINIMUM ENTRY REQUIREMENTS:

- Fluency in English writing and reading skills

TUITION:

- Training material included (English)
